DETAILED ACTION

Allowable Subject Matter

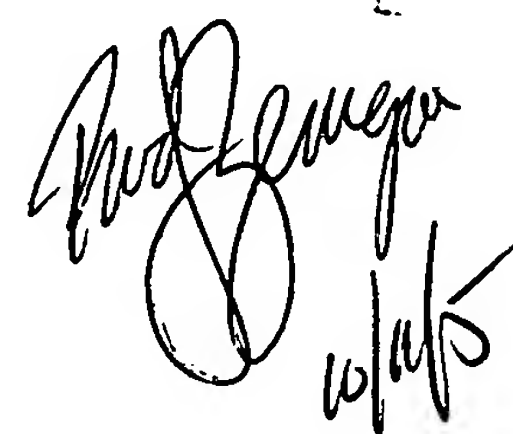

1. Claims 1-23 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:
The September 22, 2005 decision of the Board of Patent Appeals and Interferences reverses the Examiner's proposed combination of Moslehi and Notman to rearrange Moslehi's baffle plates such that each of Moslehi's plurality of holes are misaligned to define a nonlinear path for fluid flow as taught by Notman (see page 2, last paragraph). The Board of Appeals states that the cited references provide no such teaching or suggestion of the claimed subject matter – "so that holes defined in each of the plurality of baffle plates are misaligned" (independent claim 1), "the input port and the output port being aligned with each other, but misaligned with each of the plurality of orifices", (independent claim 12). Independent claim 18 is allowable according to Board of Patent Appeals because the Examiner's proposed combination of Moslehi and Rudolph (Rejection of 2/17/4, page 5) is not deemed to be sustainable by the Board of Patent Appeals: "On this record, we fail to find in the combined teachings of Moslehi and Rudolph substantial evidence in support of the examiner's position."
